Exam ID:_____

MAT21B Written Assignment
Due Friday, 4/5

Read, **R**eflect, and **R**eact (or Respond) **P**rompt #1

As students we are constantly learning and growing in different fields of study. As we grow in a particular field, it enables us to see more and gain perspective upon that subject, affecting our perception of it. You have studied Calculus for some time now and each of you has a different view based upon your previous experiences with it. I would like you to take a couple minutes to explore your perception on the subject of Calculus and briefly answer the following questions:

1. What is Calculus and why do we learn it?

2. What grade do you wish to receive in this class? What strategies are you planning to employ to be a successful Calculus student and obtain this grade?

(in memory of Dr. Silvia)
