

Presentation

Grading Rubric

Presentation grades are on a scale from 10-20.

10 Points for attempting to give a quality presentation.

–Sign up; show up; treat the subject with respect.

2 Points for providing all relevant definitions.

–The standard in mathematics is to define every technical word you use except for those used in previous classes.

2 Points for providing examples for the definitions given.

2 Points for stating the theorems in your assigned material.

2 Points for proving a theorem or outlining a complicated proof of a theorem.

2 Points for demonstrating mastery of the material.

–The typical way to demonstrate mastery is by being able to answer questions on the material.
