MAT 149A

## Homework 8

due Wednesday March 8 in class

1. Biggs 27.1 \# 3 page 392
2. Biggs 27.1 \# 4 page 392
3. Biggs 27.2 \# 1 page 395
4. Biggs 27.2 \# 4 page 395
5. In the RSA encryption system choose $n=65$. Find the decryption key $d$ for $e=5$ and for $e=7$. For $n=33$ and $e=3$ encrypt the message $M=18$.
6. (a) Suppose you are handed the cheap rubik box in the following configuration:

| 18 | 15 | 16 |
| :---: | :---: | :---: |
| 17 | 14 | 2 |
| 3 | 13 | 1 |

front face

| 12 | 11 | 10 |
| :---: | :---: | :---: |
| 4 | 5 | 6 |
| 9 | 8 | 7 |

back face

Can you bring it back to the initial configuration by a finite sequence of simple moves?
(b) Now suppose that rotating the two central rectangles by $180^{\circ}$ are also allowed moves. Can you reach the initial configuration in this case?
[Hint: Use Maple for this problem!!]
