Dear Governor Brown:

I am very excited by the prospect of universal health care and SB 562 appears to be the best chance in a generation after waiting too long for federal action. Many economies worldwide smaller than that of California provide effective universal care which would have a huge impact on our society. The health issues associated with aging, changing jobs or moving would be reduced. Public health would benefit from fewer outbreaks and better prevention. The stability of the (large) health sector of the economy would be improved.

*Please assure me that you will work to pass and eventually sign SB 562.*

I am very proud to be a California resident and a large part of that derives from our leadership in effective policy innovation.

Sincerely,  
Eric Babson
