Dear Mr President:

I am concerned about social security.

Acting SSA Commissioner Dudek in March ended Enumeration Beyond Entry- a program used by millions annually which has left many people without social security numbers. Mr Dudek is singularly unsuited to management with a history vindictive demotions, unauthorized release of information and threats to suspend all agency operations to get his way. The only plausible justification is to create significant hardship for large numbers of (legal) immigrants but perhaps he just felt like breaking something to see what would happen. Without a SSN people are not able to work or get a driver's license. The change was made suddenly and with little planning so that forms are now incorrect and many people in limbo.

*Please assure me that you will support government functionality*

My pride in the US derives in part from rational governance.

Sincerely,  
Eric Babson
