Dear Attorney General Bonta:

I am concerned about privacy.

Thank you for helping lead the resistance to the dystopian use of personal data for SNAP (a program which helped me as a child) to further the sadistic racism of ICE. Such records have long been well protected due to the obvious potential for abuse. The Biden administration increased protections while the current administration's track record with Medicaid makes clear their plans to abuse it. This twenty state suit will buy time and allow the courts to weigh in though the Republican control of the supreme court leaves the outcome uncertain. Officials should also be persuaded to think twice before signing such orders.

*Please assure me that you will prosecute personally anyone signing illegal orders affecting Californians.*

My pride in California derives in part from government accountability.

Sincerely,  
Eric Babson
