MAT21A Written Assignment
Due Wednesday, 11/16

Read, **R**eflect, and **R**eact (or Respond) **P**rompt #12

Now that the second midterm is coming up (Friday 11/18), it is time to think about what skills you need to be proficient at to do well on the exam. While studying for an exam, I would always guess what questions where going to be on the exam based on what the professor focused on in class, homework, and practice exam. I would like you to try this by responding to the following:

1. Built the list of the thirteen problems that could be on the second midterm. For example, one of the problems could be 'finding the equation for the tangent line'. Also, copies of problem types are allowed like '13 derivative problems'.
