Dear Mr President:

I am concerned about climate change. Last month the UN released its annual report on global emissions and as with much recent climate news it is even worse than expected. You have worked to undermine President Obama's limited successes moving to withdraw from the Paris deal, suing to stop states from acting, eviscerating the EPA and abdicating world leadership. Some imagined that you would fail arguing that cleaner energy was becoming cheaper and more popular so that local government action and corporate investment interests would maintain the momentum. They were wrong. You have managed to shift the US from decreasing emissions to increasing and to shift global investment (particularly Chinese) away from clean energy. Generations will curse your name.

Please assure me that you will support Ms Pelosi's initiative at the Madrid climate summit this week.

I am very proud to be a US resident and a large part of that derives from our world leadership.

Sincerely,
Eric Babson
