Dear Mr President,

I am very concerned by the draconian attacks of Attorney General Sessions on immigrants. His most recent memo will focus federal prosecutors on bringing serious charges against minor offenders. This is very destructive to peoples lives, bringing years long sentences and deportation to many of the productive members of our communities. Besides being extremely immoral it will damage the families and communities around those charged and direct law enforcement resources away from criminals. It will destroy community trust in federal officials and greatly weaken the country.

Please assure me that you will quash this abuse and refocus federal prosecutors on crime.

I am very proud to be a US citizen and a large part of that derives from the rule of law rather than mob.

Sincerely,
Eric Babson
