Dear Mr President:

I am very concerned by the access to women's health care. Planned Parenthood has been a great boon for the health and independence of many women in this country for decades. This is the sort of program anyone - in particular the federal government - should be proud to support. It is frightening and disheartening to see attempts to disrupt the essential services they provide through the proposed health bill some weeks ago as well as the regulatory change you signed today. The effect will be to leave more people in rural areas to needlessly sicken or die without access to standard health care.

*Please assure me that you will back full funding of Planned Parenthood.*

I am very proud to be a US resident and a large part of that derives from our excellent and accessible health care.

Sincerely,  
Eric Babson
