Dear Senator Feinstein:

I am concerned about privacy. FISA reauthorization has just been backed by the House leaving only the Senate and your Intelligence committee to increase accountability. A few weeks ago the then acting secretary of DHS asserted authority to forward DACA information to ICE to aid deportation. As the revelations of Snowden highlighted my government is collecting whatever information it can find. With the growth of electronic communication intimate details of people's lives are left open to anyone with the resources hack it. Whether information is gathered by our spy agencies or like DACA simply by lying about the governments ultimate intent there needs to be thoughtful statutory regulation with judicial oversight. Our privacy is too important to leave to the whim of this unpredictable administration.

*Please use your voice and vote against FISA reauthorization.*

I am very proud to be a US citizen and a large part of that derives from our three branch system of government.

s Sincerely,  
Eric Babson
