Dear Mr President:

I am concerned about health care. America has the worlds best medical technology but falls badly short with actually keeping people healthy. Life expectancy has begun to fall, many skip needed care or drugs and every comparable country manages to both do better and improve more rapidly. On a personal level I have the wealth for good access asd long as I keep working but my brother's cancer diagnosis was delayed and my mother's friend lost a son both due to poor access to basic health care. You campaigned on the popular proposition that everyone should be able to count on health care but then fought to reduce access. Your health care, trade, tax and regulatory policies are all centered on destroying what we have which with health care means the ACA. You nearly destroyed it legislatively and still rail against even dead people who voted against this attempt. In December Judge O'Connor threatened to do the deed judicially and elicited from you a gleeful tweet followed up this week by the Justice Department backing this frightening possibility.

*Please assure me that you will support the Affordable Care Act.*

I am very proud to be a US resident and a large part of that derives from our government for the people.

Sincerely,  
Eric Babson
