Dear Mr President:

I am concerned about governance. You were hired two years ago to administer the laws of this country. You are now doing nothing but try to undermine that very government. Two courts this week admonished you for frivolously blocking information from Congress and your administration stands in contempt of several committees. You have not advocated any major bills in over a year and threatened to veto even disaster funding. You have been rolling back or ignoring any administration with polluters and tax cheats seeing less legal action, regulation being left to a patchwork of state rules and many departments losing their top talent (this week it was USDA scientists resigning en mass). There was a brief hint that infrastructure (one of your many unrealized campaign promises) might get some attention but yesterday you cut off that discussion also. It may be that you are unable to govern but it is clear you are unwilling.

Please resign and clear the way for someone to govern.

I am very proud to be a US resident and a large part of that derives from our effective government.

Sincerely,
Eric Babson
