Dear Mr President:

I am concerned about greed. The recent release of information on pain pill distribution is shocking. It is shocking that anyone would be so crass as to continue to feed this crisis in the face of mounting deaths. It is shocking that prosecutors treated such antisocial behavior with so little concern with a decade of nothing more than light fines. It is shocking that courts and regulators would focus for years on keeping this smoking gun distribution data hidden from the country. While some may be able to shoot people in the street without losing support in most cases daylight is very effective against such criminal collusion. It is time to shut down the pill mills and make examples of those people responsible.

*Please assure me that you will support freedom of information.*

I am very proud to be a US resident and a large part of that derives from the rule of law.

Sincerely,  
Eric Babson
