Dear Mr President:

I am concerned about the global economy. Growth has been slowing and your policies have been both encouraging the process and reducing US abilities to help out. Like climate change, international trade requires strong diplomatic connections for things to run smoothly. You have hurt the US economy with tax cut induced deficits and political demands on the federal reserve board. Internationally you have reduced our diplomatic corps to a shell and replaced diplomacy by you and your top henchmen demanding personal favors. This has left the US on the sidelines as Britain stumbles out of the EU and China subdues Hong Kong. Your initiatives have been to attack the middle eastern economy by ostracizing Iran and cutting support for Palestine, to end the TPP and to strangle trade worldwide with an unpredictable array of tariffs.

Please assure me that you will resign.

I am very proud to be a US resident and a large part of that derives from our economic diplomacy.

Sincerely,
Eric Babson
