Dear Mr President:

I am concerned about public health. Health care is a benefit both to those receiving it and to the rest of society with public aspects including a more fit work force, more practiced doctors and a default to treat the injured but being most important with communicable disease as with vaccination rates and the current pandemic. After campaigning for expanded access you have worked tirelessly to deny treatment to the poor by cutting the CDC pandemic response system, sabotaging the ACA (yet another case is now before the court), expanding junk insurance, adding work restrictions for medicaid and terrorizing undocumented Americans. Mitigating the effects of coronavirus now demands more than tax cuts and travel bans: all barriers to seeking immediate testing, treatment and leave from work must be broken down. Senator Warren has suggested a good template.

Please assure me that you will immediately make coronavirus response universal.

I am very proud to be a US resident and a large part of that derives from our medical system.

Sincerely,
Eric Babson
