Dear Mr President:

I am concerned about unprecedented worldwide death and economic collapse. Shockingly you are not satisfied gutting the CDC, eliminating its international response capability and ignoring expert advice but have moved on to defund the World Health Organization - the most effective remaining entity to coordinate world response. The toll is mounting around the world with a clear correlation between the suffering and disorganization of regions. It is difficult to grasp the level of depravity your move represents. Maybe you simply want to drag as many as possible down with you. We can only hope that the courts have not yet been too compromised to preserve WHO funding.

Please assure me that you will resign immediately.

I am very proud to be a US resident and a large part of that derives from our global leadership.

Sincerely,
Eric Babson
