Dear Mr President:

I am concerned about covid-19. Your usual approach of big lies and sidelined experts has made America the center and principal source of a pandemic. True to form you did not learn from the resulting carnage but continue to assume that if we all just close our eyes everything will be great again. Today a study of cell phone data found that relaxing rules in Georgia immediately brought people in so that other states' cases will also spike. Also today you quashed a CDC outline for prudent reopening guidelines leaving our mayors and governors again to go it alone.

*Please assure me that you help with national coordination following experts over whims.*

I am very proud to be a US resident and a large part of that derives from our national unity.

Sincerely,  
Eric Babson
