Dear Mr President:

I am concerned about deadly lies. The CDC had become the worlds preeminent public health agency with a deep bench of scientists studying everything from basic biology to immediate policy and a widely trusted array of public documents touching all aspects of public health. Now some email of Mr Caputo (a lobbyist you appointed to the HHS leadership this year) and his sidekick Dr Alexander have surfaced detailing a campaign to inject political lies and delays into these reports which has already caused deadly overuse of chloroquine and increased COVID transmission through children.

Please assure me that you will fire and prosecute Mr Caputo and Dr Alexander.

I am very proud to be a US resident and a large part of that derives from our world policy leadership.

Sincerely,
Eric Babson
