Dear Ms Lee:

I am concerned about deadly lies. The CDC had become the world's preeminent public health agency with a deep bench of scientists studying everything from basic biology to immediate policy and a widely trusted array of public documents touching all aspects of public health. Now some email of Mr Caputo (a lobbyist who joined HHS leadership this year) and his sidekick Dr Alexander have surfaced detailing a campaign to inject political lies and delays into these reports which has already caused deadly overuse of chloroquine and increased COVID transmission through children. Mr Caputo just took medical leave after ranting about sedition and ceiling shadows but his destruction has been on Secretary Azar's watch.

Please assure me that you will remove Secretary Azar, Mr Caputo and Dr Alexander.

I am very proud to be a US resident and a large part of that derives from our world policy leadership.

Sincerely,
Eric Babson
