Dear Mr President:

I am concerned about human rights. Your repugnant immigration policies reached their nadir with the systematic kidnapping of children, a policy you implemented with the help of General Sessions. As documents from that time have leaked and been reluctantly turned over to the court your intent to destroy families never to be reunited has been made clear. More than one hundred infants (under 5) were seized and only now are we learning that more than five hundred children remain stranded - years later - unable to find their families. Rather than throwing Justice Department resources at indicting our next President, working to bring closure to this dark chapter might allow you to sleep better in your cell come February.

Please assure me that you will find the families of the children seized by ICE.

I am very proud to be a US resident and a large part of that derives from our human rights.

Sincerely,
Eric Babson
