Dear Senator Harris:

I am concerned about the epidemic. Congratulations. I hope and believe that your administration will rapidly change many things from the past four year's disaster with overhauling courts, rescuing the economy, welcoming immigrants, regulating carbon and rejoining world bodies high on the list. Possibly the biggest administration failure has been COVID where simply having central leadership to look to would have saved thousands of lives and the past few days have all set infection records. Here the Biden administration can start immediately by setting up a task force which may only be part of the government and able to enforce rules in eleven weeks but can provide guidance for people and local and state governments to look to now.

*Please assure me that you will lead against COVID immediately.*

I am very proud to be a US resident and a large part of that derives from our rational policies.

Sincerely,  
Eric Babson
