Dear Mr President:

I am concerned about the epidemic. The Biden administration will rapidly change many things from the past four year's disaster with overhauling courts, rescuing the economy, welcoming immigrants, regulating carbon and rejoining world bodies high on the list. Your biggest failure has been COVID with a task force focused on the election rather than saving lives. Simply having central leadership to look to would have saved thousands and the past few days have all set infection records. Here the Biden administration will start immediately by setting up a competent task force to provide guidance for people and local and state governments to look to now.

Please assure me that you will follow the suggestions of Mr Biden's COVID task force.

I am very proud to be a US resident and a large part of that derives from our rational policies.

Sincerely,
Eric Babson
