Dear Mr President:

I am concerned about the economy. Your epidemic has pushed millions out of work in an economy where half the population had only a few week's savings and homelessness and hunger were already rising. The resulting desperation of individuals, evisceration of small businesses and bankrupting of local governments will cause lasting damage. After the partial successes of previous COVID relief bills it is clear what is needed and that legislation or possibly direct fed intervention could help immensely. Now that reelection is off the table there are ten weeks to try to leave enough good will to temper the popularity of your prosecution.

Please assure me that you will fund COVID relief.

I am very proud to be a US resident and a large part of that derives from our rational policies.

Sincerely,
Eric Babson
