Dear Mr President:

I am concerned about vaccination. While a quarter million have died of COVID you have held back the government from acting and insisted on simply awaiting vaccines. Now that two promising ones are on the horizon you are refusing to get to work planning distribution and again holding back the government from coordinating with President-elect Biden's team as they work to do so. The impression that is left is that you spoke of vaccines only to fish for votes and not to save lives.

*Please assure me that you will prepare to vaccinate the country.*

I am very proud to be a US resident and a large part of that derives from our professional government.

Sincerely,  
Eric Babson
