Dear Mr President:

I am concerned about vaccination. Your utter failure first stopping and then mitigating COVID-19 have left the country and the world awaiting vaccines as the death toll mounts. Fortunately several are seeing strong early testing but now national leadership and international cooperation are required for effective distribution. Several groups are working toward this goal from the more humanitarian WHO and Gates Foundation to the governments of Russia and China but the US so far has mostly acted to disrupt the WHO project and rush to buy up early stocks while you play golf and the Senate holds hearings on hydroxychloroquine. Waiting for the Biden team before beginning to prepare will kill hundreds of thousands of people.

*Please assure me that you will prepare for vaccine distribution.*

I am very proud to be a US resident and a large part of that derives from our world influence.

Sincerely,  
Eric Babson
