Dear Mr President:

I am concerned about recovery. Your utter failure with COVID has killed a third of a million Americans and counting while plunging the rest of us into economic disaster. The Dow and trade deficit are not the economy and the wealth gap left people, small businesses and local governments with little to pad against hunger, homelessness, closure and layoffs. The latest jobs report brings home that as with the Bush recession of 2008 people are falling out of the labor force suggesting another long slow recovery. It is clear how to keep things afloat until the remarkable new vaccines are fully deployed with the House having passed the basic blueprint in May. It is time to take a break from grifting and consider your legacy.

Please assure me that you will champion a CARES extension.

I am very proud to be a US resident and a large part of that derives from our standard of living.

Sincerely,
Eric Babson
