Dear Mr President:

I am concerned about pandemic. Your failure with COVID domestically has killed hundreds of thousands but the third world toll could still be much worse. A quarter of all US deaths are now from COVID but the rapidly expanding vaccination program promises an end in sight. Throughout the pandemic you have worked to force states and smaller countries to fight for resources and actively attacked the WHO and its initiatives for a world strategy leaving poorer countries to try their luck with China's unproven vaccine. Amid hints of significant underreporting throughout Africa and some more infectious variants now circulating a strategy is essential.

Please assure me that you will pursue a world COVID strategy.

I am very proud to be a US resident and a large part of that derives from our medical leadership.

Sincerely,
Eric Babson
