Preliminary problems. These problems should be completed before discussion on Thursday.

(P1) Find the value of $\delta$ for the following code.

$$\{1110001, 1001001, 1010101, 0011111, 0011100\} \subset V^7$$

How many errors does this ensure you can correct?

(P2) Determine whether the codewords in Problem (P1), viewed as vectors in a 7-dimensional vector space over $F_2$, are linearly independent.
