Let's Get Real About Energy

Physics and Physicists — This is a rather good and eye-opening article. It gives, in very simple terms, the level of energy consumption using comparison that many people can understand. ...

Basic Facts About the Energy Challenge

AI Fin —The problem with hydrogen is that both the creation and the use of hydrogen are energy-inefficient steps. Adopting hydrogen as a transport fuel would increase our energy demand. And, as I hope the numbers above have shown, supplying energy to match our demand is not going to be easy. _CNN ...

Rotating Out of the Imaginary Plane

Swans on Tea — Commentary: Let's get real about alternative energy Lots of good stuff, including some tips that quantify some suggestions for efficiency, Take, for example, the idea that one of the top 10 things you should do to make a difference to your energy consumption is to unplug your cell-phone charger when you are not using it. The truth is that leaving a phone charger plugged in uses about 0.01 kWh per day, 1/100th of the power consumed by a lightbulb. This means that switching the phone charger off for a whole day saves the same energy as is used in driving an average car for one ...
