## Monday

November 17

### White Hole

The Big Bang created the infinite universe in a fraction of a second. But most explosions don't happen this way. That's why one team of mathematicians has proposed an alternative scenario.

## Tuesday

November 18

### Size and Gender

Some animals, like the clown fish, can switch sexes from male to female or vice versa. Now, scientists are closing in on what might trigger this radical change.

## Wednesday

November 19

### Titan's Surface

In a year's time, NASA's Cassini spacecraft will launch a probe to Titan, Saturn's largest moon. But until then, a powerful telescope here on Earth can give us a sneak peek.

## Thursday

November 20

### Sleeping After Eating

Next week is Thanksgiving, making this listener question particularly relevant: Why does eating a lot make you nod off? Bob Hirshon has the answer.

## Friday

November 21

### Bears and Wolves

Satellite images show that the ice covering the Arctic Ocean has thinned. We explain the impact of this, as well as how wolves are bringing harmony to Yellowstone National Park.
