*“To every thing there is a season, and a time to every purpose under the heaven”*

— Ecclesiastes 3:1

... and it is now time for prelim!

This ”Bible for Prelim” emerged from my notes to prepare for the mathematics preliminary exams at UC Davis over the summer of 2017. I did not start with an ambitious goal of finishing all past prelim questions in the database, namely from Winter 2002 to Fall 2017. But as time progressed studying day and night, I was able to finish almost all questions by the end of the summer. These notes are truly made out of blood, toil, sweat, and tears.

This work would not have been possible without the support of other graduate students. I am grateful to Chao-Ping Lin, Yanwen Luo, Anthony Nguyen, Adam Rose, and Chang Shu, and Zhongruo Wang, who spent a lot of time in solving prelim problems with me. I am especially indebted to Alvin Moon, Jake Reschke, and Jingyang Shu for their intellectual and emotional support whenever I became weary, frustrated, or even devastated in doing prelim problems. I would not know so much beautiful math in the theory of operator and PDEs without their teaching.

Finally, my heartfelt thanks go to Prof. John Hunter, Prof. Bruno Nachtergaele, and Prof. Steve Skoller for their teaching and kindness throughout the year. Without their encouragement I would have quitted the PhD program in my first-year and gone back to work in industry in Germany. Also, thank you to Prof. Dan Romik for organizing the prelim preparation workshop and providing me guidance to take care of my mental care. I always enjoy speaking Hebrew with him. Todah Rabah! I am equally thankful to the departmental administration staff, Tina Denena, and Stephanie Myers, for always having time to chat with me and for tolerating my hilarious, but sometimes nonsensical jokes.

I sincerely wish you the very best in your preliminary exams. I have no doubt that you will do great!
