

CALCULUS I and II Honors HNR 90X-06, Fall 2013

Instructor: Zeke Vogler

Lecture: T 10:00am-10:50am at 3106 Math Sciences Building (MSB)

Office: 3141 MSB

Office Hours: By appointment

E-mail: zekius@math.ucdavis.edu

Webpage: <http://math.ucdavis.edu/~zekius/f13mat21abh>

Written assignments, worksheets, and more can be found at this webpage. Please become familiar with the resources that are available to you there.

Text: Thomas' Calculus: Early Transcendentals 12 ed.

Course grade will be based on the following:

Attendance	10%
Written Assignments	40%
Final Project (due December 6, 2013)	50%

Written Assignments:

The written assignments are thought provoking questions that you need to respond to by writing **at least** two sentences. These assignments will be given every week at the beginning of class and **due** the following lecture. These will be posted on the class website the day they are assigned.

Final Project:

There will be worksheets handed out almost every lecture. While I expect you to work on them every week, nothing will be submitted until the end of the quarter. There will be two groups (21A and 21B students), and the goal of each group is to submit **one solution key** to all the worksheets. This solution key is **due** on December 6, 2013, and the group will receive a grade based on this solution key. The solution key should be clean, well written solutions to all the problems on each worksheet. The exposition of the solution is **more important** than getting the right answer. More details about this will come later in the quarter.
