Homework:

There are two parts to the homework: the classical and written assignments. You will **only** be graded on the written assignments. I use the written assignment scores when a final grade is close to another grade in either the positive/negative direction. If this grade is close to another ($\sim \pm 1\%$) and the written assignment score aligns in that direction, then I would give the student the close grade, according to my judgement. These scores can (at most) adjust your final grade by a + or -. NOTE: The written assignments has no 'apparent' affect on most students' final letter grade.

Classical Assignments:

The classical assignments are problems from the book that are posted on the website. These will be assigned daily, but will **not** be collected. *It is your responsibility to do homework regularly and ask for help when needed.*

Written Assignments:

The written assignments are thought provoking questions that you need to respond to by writing a few sentences. These assignments will be given randomly throughout the quarter at the beginning of class and usually **due** the following lecture. These will be posted on the class website the day they are assigned.
